Nikita International

Handcrafted Bangladeshi Tile

Much of the beauty and appeal of handcrafted tile resides in those slight variations in size, color, design, and texture that reveal each tile as a unique work of art. The skilled artisans who create these extraordinary tiles in the colonial region of Khulna, Bangladesh, are working in a tradition that goes back centuries. These tiles have a personality and warmth that is simply lacking in machine-made tiles. By purchasing these tiles, you join us in helping to preserve this rich heritage.

Among the few of Bangladeshi skilled artisans working today in the Talavera tradition, none are producing finer or more beautiful tiles than these. These handcrafted Bangladeshi tiles are the creations of a small, family-run workshop, whose artisans represent several generations of dedication to the craft. Scrupulously adhering to traditional methods, they use only the finest materials. The clays are meticulously selected, mixed, cured, formed, and fired – in a time-consuming process that ensures durability. No modern chemical-based colors are used.

Nikita International is the largest of its kind not only in Bangladesh but also in the whole of Southeast Asia was incorporated as Private Family Company in 1982. Over a long period of 27 years this Company is engaged in manufacturing quality structural clay products like Bricks, Blocks, Pavers, Terracotta Clay Tiles for Walls, Floors & Roofs, etc. with technology being developed from time to time by its R & D Dept. through which it has been possible to market various products to meet the latest Demands of the market.

The Company now produces million pieces of different products per annum. Besides meeting the country's requirement we export a sizeable quantity, earning, not only foreign exchange but also has earned a reputation in and outside the country, for our reliable and quality products. Our Company was also awarded many times due to its outstanding export performance in its own field.

Nikita International is the manufacturer of high quality 100% Handmade natural clay products, refractory and terracotta tiles for Wall, Floor & Roof, was the first of its kind in the whole of South Asia when it is started 27 years ago.

100% Handmade Natural Clay Products made by Nikita International possess all the qualities demanded by people in the building industry and by home owners. The finished products possess fine textured smoothness, well defined corners, edges and surfaces designed for durable and heavy duty performances.

The beauty of the rustic and antique of our culture is brought to you by Nikita International in a collection of more than hundred pieces of clay products such as wall and floor tiles, pavers, swimming pool copings, bricks and special pieces. With our wide variety of designs we will transform your home into the magical and comfortable place you have always dreamed of.

All our pieces are 100% hand made by our experienced Bangladeshi craftsmen, selecting and mixing the clays to the right consistency, following a tradition of more than 500 years. The clays are extracted and selected from 2/3 feet under the plain paddy land, and mixed carefully to offer you a unique piece in its texture, color and durability. We add water to the clay until we have the perfect consistency to allow the pieces to be chapped in the mould.

The wall and floor tiles are manufactured by hand using wooden moulds. Each tile is produced individually and is placed on the ground for a period of three days, allowing the sun and the wind to cure and dry it.

All hand made pieces will have slight variations one from the other and some may even have the footprint of foxes, chickens, cats, dogs, and other animals that inhabit the region. This gives our pieces a very special and unique look. In order to preserve and improve our environment, we have planted over 500,000 trees to be used as fuel in our firing process.

We carefully pack each and every pieces in pallets or in crates which are then transported in containers to their final destination.

Installing Handcrafted Bangladeshi Tiles

These tiles are durable. They will last for centuries under congenial conditions, as the magnificent tile-clad homes and public buildings of their native Bangladesh attest. They will never fade or peel. They are easily wiped clean. While they are not appropriate in settings that receive heavy wear or pressure and are not freeze-tolerant, they accept wide variations in heat, cold, and damp.

Our tiles are recommended for interior wall use — for example, as a backsplash for kitchen or bathroom counters, on stair risers, or to frame windows or doorways. But they are frequently and successfully used elsewhere — outdoors in temperate climates, as accent or border tiles on countertops, tabletops, or floors, and in pools. Because handcrafted tiles are often not perfectly flat, special care needs to be taken when installing them where they will be subject to wear or pressure. Installation constitutes acceptance of all risks.
