Installing Handcrafted Bangladeshi Tiles

These tiles are durable. They will last for centuries under congenial conditions, as the magnificent tile-clad homes and public buildings of their native Bangladesh attest. They will never fade or peel. They are easily wiped clean. While they are not appropriate in settings that receive heavy wear or pressure and are not freeze-tolerant, they accept wide variations in heat, cold, and damp.

Our tiles are recommended for interior wall use — for example, as a backsplash for kitchen or bathroom counters, on stair risers, or to frame windows or doorways. But they are frequently and successfully used elsewhere — outdoors in temperate climates, as accent or border tiles on countertops, tabletops, or floors, and in pools. Because handcrafted tiles are often not perfectly flat, special care needs to be taken when installing them where they will be subject to wear or pressure. Installation constitutes acceptance of all risks.
